

NOVEL CORONAVIRUS COVID-19 ADVISORY

What You Need to Know

WHAT IS CORONAVIRUS? Novel Coronavirus is a virus that has only spread in people since December 2019. Little is known about this new virus and it has the potential to cause severe illness and pneumonia in some people.

WHAT ARE THE SYMPTOMS?

Most symptoms appear after 2-14 days of exposure and include fever, cough, and shortness of breath.

FEVER

COUGH

DIFFICULTY
BREATHING

HOW DOES IT SPREAD?

- In the air by coughing or sneezing
- Touching a surface with the virus, then touching your face
- Close personal contact such as shaking hands

WHAT YOU CAN DO:

- Wash your hands thoroughly
- Cover your coughs and sneezes
- Avoid touching your face
- Stay home if you're sick
- Avoid close contact with people

WHAT WE'RE DOING:

- Cleaning of high-traffic areas
- Daily deep cleaning
- Additional hand sanitizers
- Offering make-up classes for members who stay home
